Dear Panel

My name is Alysha McIntyre and I am a thirteen year old girl and I live in the Yarramalong Valley.

I understand there is a Korean Mining Company trying to start a mine here on the central coast. I think this is a very bad idea as this will cause many problems for the environment. I am worried that when the creeks and river dry up from the loss of the underground water from the damage caused by the mine. The platypus and fish life will have nowhere to go, they should be able to live in their natural habitat. I don't want to have to see these animals in an aquarium.

I don't want to have to drink bottled water from a shop when I want a drink. I may be young and I may not have the power to stop this mine but I have a voice and I am saying now to stop this mine.

I would like to be able to help my community by standing up against this mine. I know my friends will support me on this and that they would feel the same way.

Adults and parents overthink things, its plain to me that the risks to the environment are not worth the money. When the money is gone all we will have left is holes in the ground,dry rivers, no animals, no plants , no water and no future.

Please do the right thing

Yours sincerely

Alysha McIntyre
