To Whom It May Concern

My name is Julie Prowse and I live on the Liverpool Plains with my husband Michael and our two children. My husband and I were both born and raised on the Liverpool Plains. Our families goal has always been to improve the land we live on so as it can continue to be used to produce wholesome food to feed Australian's and the world's population into the future.

It saddens me and as you can imagine angers me that after all of these years of caring and nurturing the land we live on that you could possibly allow mining to take place, especially as this is one of the **highest food producing areas in the world**.

There is **no guarantees** that the water will not be affected by mining and with Australia being one of the driest continents on earth it is of utmost importance that we look after the Liverpool Plains, which carries one of our most precious resources, **water**.

You must think about your decision very carefully as to whether or not you let this mine go ahead as it will have grave affects on this beautiful **Prime Agricultural** area which no doubt has fed you, your children and will continue to feed many generations into the future if left unmined.

Please don't be responsible for allowing future generations to be without the bare essentials which are '**water and food**'. We can't live without them!

Yours faithfully

Julie Prowse
