Dear sirs,

Thank you for your update, we are not available for that day but we send our concern and objection to over build and no community consideration for the captioned.

The traffice is not bearable at presnet, but the fact is they approved the developement so what can we do.

Our concern is living in such a condense evenvornment is very unhealthy. Council and state government are not planning to design the infrastructure for the flow of traffic.

The contribution of 3.5million is not equal to the need of community to scarfic the community service.

We support to object further increase of units and extension of development.

Keep us inform for this unfair and no consideration of government action.

Tim
