

Commissioners, many thousands of people in communities in two shires are absolutely sick and tired of the attitude of the Promoters who are in charge of North Byron Parklands. This latest wiping of their feet on communities by advertising on Social media, radio, Magazine, papers, and around the globe the line-up of acts for the next Fall's Byron is a prime example of the (bull shit) that they have been feeding both you and us. Today as we speak they are selling the tickets. <sup>Spam</sup>

What do they know that we don't?

We have been told by the DOP that they do this at their own risk.

They have paid high prices for their line-up, and contracts would have been signed, so I doubt NBP feel they are going to lose.

This is a code of conduct, and a very dubious situation they have placed this PAC meeting and you in. In saying all this you will be hearing today from their supporters how wonderful NBP are, how they have contributed money to a particular group. How they bring in much needed money and how they have met all the KPIs and conditions of consent.

Well they have not, we have been both yours and our watchdog for the last 9 years and we have seen our community dissolve. What with everyone setting up Air BnBs. Noise in different areas being so bad, people have to leave their homes. Camping and all that goes with that in public places, line-ups for buses that stretch into other streets that are horrendous in villages, traffic that also turn into stoppages that prevent locals from accessing their place of employ, being late, etc.

Then we have the situations of people behaving badly in front of families, Drunken youth all over the place,

Telecommunications that go down because the area is over loaded. Putting lives at risk. This has not and cannot be fixed unless new towers are built. It has not been included in any PACs final decisions but is a must for resident's safety in two shires.

This year as is usual we have situations arise during and after the event from Punters coming from all over the world and Australia, we have flu and other viruses explode. To the extent that our hospitals and other hospitals, in other shires and states are overwhelmed. Our health services have been on radio talking about this situation and its real effects.

We are a shire of 14,500 rate payers and approx 30,000 residents. The enormous effect on our infrastructure is insurmountable.

People being shipped into already crowded villages in morning and then bussed back to NBP at the beginning of the festivals is just unbelievable.

We the community become prisoners in our own homes. We are being loved to death and I for one am over this situation as are thousands of residents..

These promoters are all about money, and now that it has been bought by overseas promoters the biggest in the world, it will only get bigger and bigger, poss as big as Glastonbury, as was quoted by Jessica Decrou in a magazine article years ago.

Plus the absolutely over crowded satellite city (I have attached photo) they bring into this shire which is both unsustainable and untenable.

They make all the money, give honey money back to a few groups, whom I'm sure are here today to say how wonderful these promoters are; they use our infrastructure to our detriment and horror.

The reports you receive are on so many levels bogus and misleading and do not cover the real story that is unfolding in two shires that are invaded yes invaded.

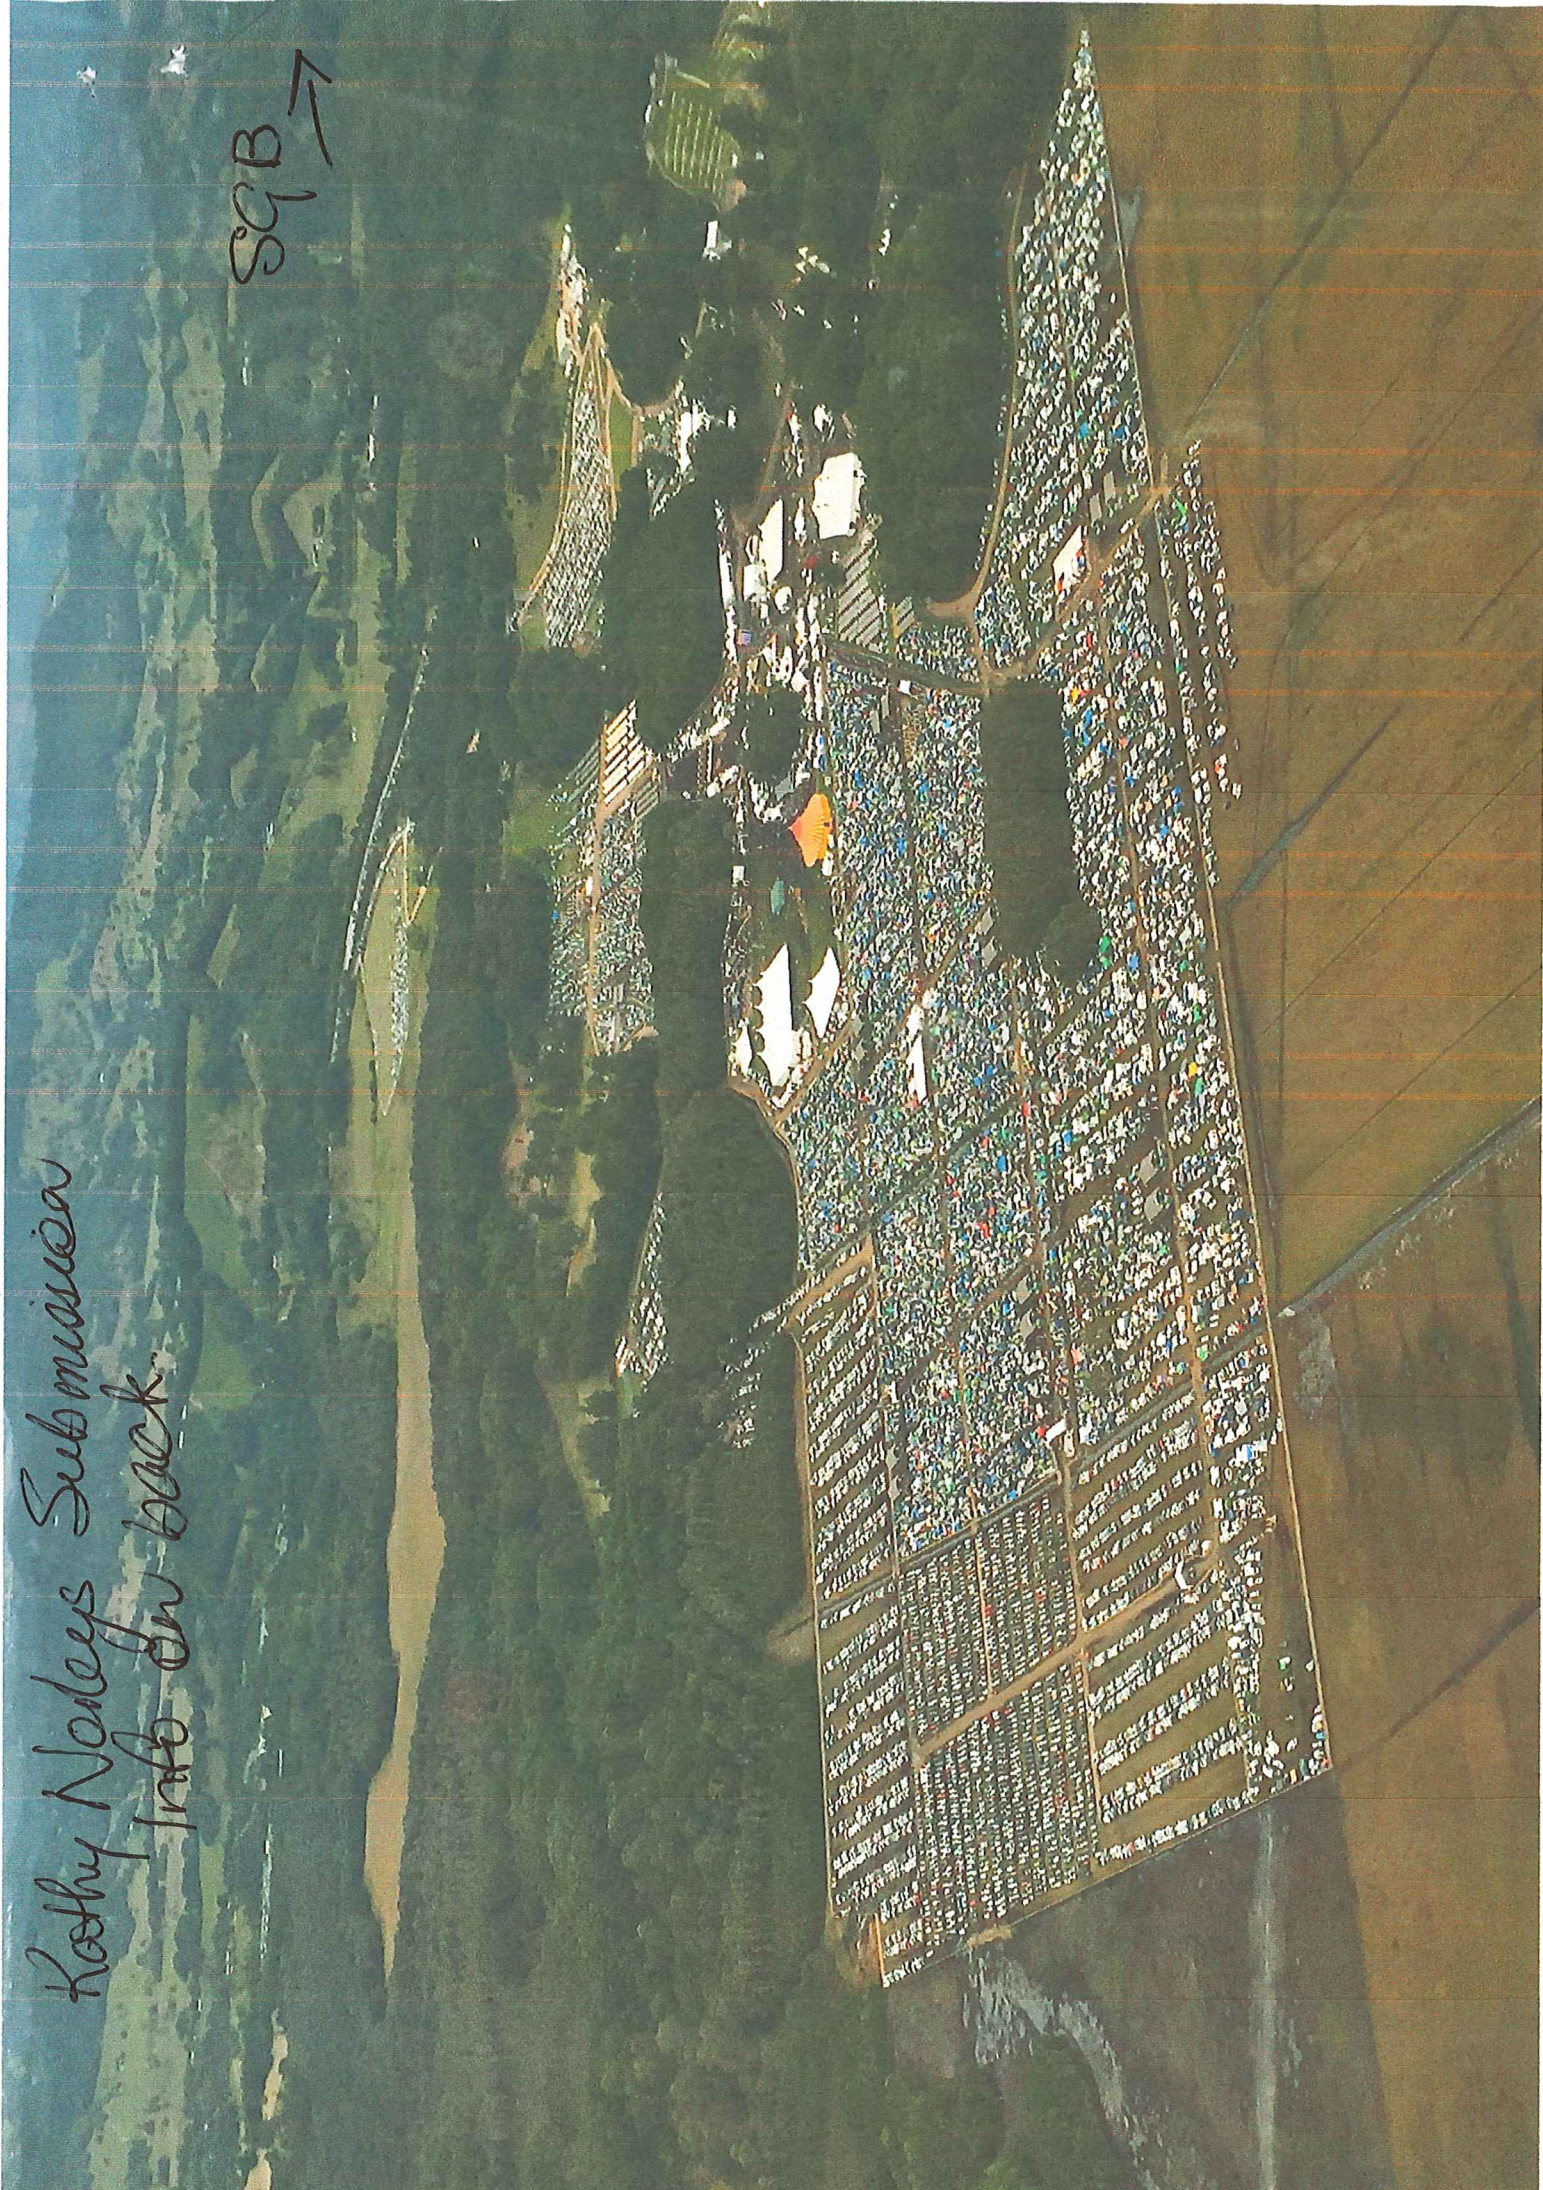

This Extension should not be granted and an independent report should be implemented including all the breaches and serious infringements, police report, health department report, and telecommunications report.

Also the stampede that happened in Lorne should be a part of this report. All this information should be collated and then the decision made.

Also it should be handed back to the Byron Shire Council as was the PACs decision in the first round. I will not say thank you as I am too angry and upset about the way our shire has been treated by the promoters with their wipe their shoes on community attitude.

Robby Nordeys Submission  
Info on back.
