Dear Sirs,

I am protesting the approval of the Wallarah 2 coal project with a coal loader situated at the end of Blue Haven. The then premier Barry O'Farrell promised if elected that this mine would not go ahead. No ifs, No Buts, Quaranteed. This project has been opposed for the past 20 years by the Central Coast population. Apart from the issue of water and subsidence there are health issues with coal dust. Pollution of land air and water are major issues of concern. The projected income to NSW is questionable and the promise of local jobs inflated.

This project seems to be a phoenix that keeps rising from the dead. A foreign government seems to have too much say in what happens in our state. This project needs to be finally killed off once and for all.

Regards Tim Phillips.
