Subject: Thunderbolt Electricity Generating Works IPCN Submission Objection
Date: Monday, 25 March 2024 4:43:48 PM

Dear IPCN Panel,

There is NOTHING about Neoen's planned Thunderbolt Wind Electricity Generating Works that benefits Kentucky, NSW or Australia whatsoever as it is yet another diabolical plan to irresponsibly wreck Australia through the deviously orchestrated Fake Green RenewaBULL Wind/Solar Energy Poverty Grift & Ponzi Scheme/Scam that's cursing Australian's with skyrocketing Electricity prices = 'Cost of Living' Crisis, Economic Suicide, Environmental Destruction, De-industrialisation, De-population, Deliberate Hostility & Destructive Targeting of Rural Communities & Australia's limited, irreplaceable, life-sustaining Food Producing Land & Vital Water Sources

Neoen & the NSW Department of Planning, Housing & Infrastructure have done nothing to ensure the protection of our precious Environment- Ecological Habitat & Biodiversity, our Visual Amenities - pretty Rural Outlook & Iconic Kentucky - Beautiful Balala Landscapes, our Economic Prosperity, our Independent Energy Security, our National Security or our Public Health & Safety in their outrageously destructive & pathetic plan & Assessment
Either they are intentionally acting against the best interests of the people of NSW/ Australia or they are seriously stupid!

Similarly approved plans by the Department & complicit IPCN constitute gross negligence - 'a lack of care that demonstrates reckless disregard for the safety or lives of others, which is so great it appears to be a conscious violation of other people's rights to safety'

With the Department's self proclaimed 'Risk Based' procedure & the rubber stamping IPCN's Dereliction of Duty to adhere to their professional Code of Conduct/Code of Ethics - in their flagrant disregard for the facts & intentional forcing of Risky Ideologically based Experiments that have NO sound Engineering Facts, NO Scientific Rigour, NO integrity & NO Ethics = Moral Hazard - onto naive, foolish, cash strapped or even objecting Rural Councils & so many outraged Community victims - including Kentucky, - the words of Federal Court Judge Justice Natalie Charles-worth - in the Santos Barossa case ring true for approvals in this RenewaBULL Swindle - relying on nothing but:-
"confection ... made up evidence - so lacking in integrity that no weight can be placed on it!"

Like the hapless NSW Energy Policy Bureaucrats & Approving Bodies, the Federal Government's advice has only been that of also 'JUST TRUSTING THE DEVELOPERS' - with notably:- the Solar/Wind Industry itself - alias the self approving 'Clean Energy Council' thanking Lisa Stiebel (Neoen) whose initiative and support helped bring this guide to life" - this totally dodgy Developer/Host PROPAGANDA - 'Australian Guide to Agrisolar for Large Scale Solar' - March 2021 - disseminated to me as the ONLY information available from the Federal Government to those of us with well founded & proven, seriously detrimental & harmful concerns/impacts from the Fake Green, totally disingenuous RenewaBULL Fraud

Including all the Fake Green Carpetbaggers & useful idiots - as stated:-

"We would particularly like to thank

the companies and farmers who contributed their insights to solar grazing in Australia, including farmers Eddie Rovers, Tom Warren, Damien Sexton, Peter Cheal and Cr Ken Keith OAM, and organisations Akuo Energy, BCJE Australia, Beon, Bouygues Construction Australia, Canadian Solar, Downer, Enel Green Power, Energy Estate, ESCO Pacific, FRV, Goldwind, Gransolar, Impact Investment Group, Maoneng, Neoen, Octopus Investments, University of Queensland, and UPC\AC In addition, the Clean Energy Council would like to thank Lisa Stiebel (Neoen) whose initiative and support helped bring this guide to life

The Clean Energy Council acknowledges the support and expertise of our international counterparts SolarPower Europe, Fraunhofer Institute for Solar Energy Systems and the American Solar Grazing Association

We are also grateful to the many people and organisations who provided advice and feedback including the National Wind Farm Commissioner's Office, Agriculture Victoria, the Queensland Farmers Federation,

NSW Farmers, NSW Department of Primary Industries, Farm Renewables Consulting, Realliance and Wynergy "

Enabling deceptive multi-national bully TransGrid & their State Grid Corporation of China buddies to plunder Australia & barge through their nefarious, controlling & extremely destructive, inhumane, Marxist agenda of CONTrolling, unnecessary Transmission Line global electrification - energy deprivation & poverty for everyday Australian families - is clearly sabotaging Australia - undermining our essential Independent Energy Security & National Security - making us dependent on or most hostile enemy - the Chinese Communist Party - TREACHEROUSLY ENABLING BEIJING TO TURN OUR LIGHTS OFF!

To have any credibility or ounce of independent reputation, the IPCN must condemn the Department's Approval of Neoen's ECOCIDAL Thunderbolt Wind plan - the idiocy of Transition to Extinction via weather dependent Wind Turbine Junk & the glaringly obvious FOOD SECURITY + INDEPENDENT ENERGY SECURITY = NATIONAL SECURITY NIGHTMARE as recently exposed by ASIO's Mike Burgess as he questioned what it would mean for the country if a foreign state "took down all the networks, or turned off the power during a heatwave?"

"I assure you, these are not hypotheticals," he said.

Continued

ELECTRANET'S PROJECT ENERGY CONNECT is owned/controlled by Australian Utilities Pty Ltd (53.44%) & the CHINESE COMMUNIST PARTY'S STATE GRID CORPORATION OF CHINA (46.56%).

IN THE LIGHT OF MALAYSIAN PRIME MINISTER INWAR IBRAHIM RECENTLY STATING AT THE MARCH ASEAN CONFERENCE HE DOES NOT WANT A TOUGHER LINE WITH CHINA & Albanese's "steadfast vision" announcing \$2 Billion SE Asia Investment in Infrastructure & Clean Energy - it is alarming to note that

(including my neighbour Bomen

Solar & the strategically positioned Dinawan Hub in Line with Project Energy Connect in the SW REZ - linking in with the much maligned VNI West)

MALAYSIA'S TENAGA NASIONAL WINS SPARK RENEWABLES AUCTION.

“TNB Forges Strategic Alliance with CHINA'S STATE-OWNED UTILITIES to Revolutionise ASEAN POWER GRID!”

25/01/2024

TENAGA NASIONAL BERHAD

The DPE NEVER consults & continues to lie & deceive.

If the Department had considered the Environmental, Social & Economic impacts factually they would have rejected Thunderbolt Wind.

Instead they have no respect for impacted human beings & used

“confection .. made up evidence - so lacking in integrity that no weight can be placed on it!”

(Justice Natalie Charlesworth)

The Department's Assessment Approval of Neoen's false claims that Thunderbolt Wind would provide power for up to 99,000 homes is absolutely false!

Neoen are perpetual liars - claiming

160,000 homes will be powered by

their controversial, obnoxious CULCAIRN SOLAR NIGHTMARE, neighbouring FRV's CONFLICT OF INTEREST WALLA WALLA SOLAR RUINATION, near MUCH MALIGNED JINDERA SOLAR & TRINA'S STITCHED UP, FAILURE OF DUE PROCESS GLENELLEN SOLAR ALL FORCED ON GREATER HUME WITH NO CONSENT, AGAINST THEIR WILL, WITH NO SOCIAL LICENCE - YET SHOCKINGLY NEOEN'S HATED CULCAIRN SOLAR HAS UNCONSCIONABLY BEEN UNDERWRITTEN BY THE NSW GOVERNMENT!!

No credible Electrical Engineer adhering to their Code of Conduct would approve such obvious deception!

Solar only has a 25% Capacity Factor &

“Wind only blows two days out of five,

If you only had to go to school two days out of five, you wouldn't get very far at school, but we are are designing an energy school which we are just not going to pass!” (Adi Paterson)

Wind has lots of periods of absolutely zero output.

It has no chance of supplying ANY homes during those periods, and neither will any other wind works at those times during wind droughts.

Extreme variability is a characteristic of Wind generation

The Grid is not like a Bank Account!

It's not possible to borrow now and pay back later. Supply must match demand at all times, second-by-second, 24/7, 365 days per year. That means that the grid can't work with average outputs. If a wind or solar generator drops its bundle, as they do often do, and there is nothing available to instantaneously fill the gap, the grid goes down, into prolonged blackout. So, intermittent generation is both pointless AND extremely dangerous.

Electrical Engineer Paul Miskelly's initial Battery Storage findings for the Eastern Grid show that Neoen's Thunderbolt plan would require 74 GEELONG SIZED BIG BATTERIES

- requiring 2 hectares per BESS

YET ANOTHER LAND GRAB of

for FILTHY, TOXIC JUNK on our limited, irreplaceable, Agricultural Land

it is a **technically fraudulent claim** to state that a wind generation facility, can power up to 99,000 homes(or any other number) for a year (or any other period)

Such a claim is a total fallacy for the following technical reasons - this is hard engineering fact, not consensus or opinion:-

- The domestic dissipation (either maximum, minimum or average) has not been stated;
- The period during an average day's usage has not been stated;
- The maximum and minimum usage per day has not been stated;

- There has been no account taken of the variable nature of wind velocity, no average, no minimum, no maximum; thus, actual max/min/average generated energy has not been calculated

Therefore overall, there has been no proper engineering calculation of generated energy or consumed energy, thus the claim to "power 99,000 homes over a year" is a total fraud and is in fact meaningless

Such fraudulent statements are nothing more than deceptive advertising for a defective system, trying to make it look legitimate where in actual engineering fact it cannot provide reliable power for anything, never mind 99,000 homes

In order to make a proper assessment of such a system the following data needs to be developed:

- The average power drawn by an average household;
- The period per day of such power drawn, this allows calculation of the energy drawn;
- The maximum and minimum figures for the same should be estimated
- This will allow calculation of the maximum, minimum and average energy figures drawn per household per day (note no account of seasonable differences are taken in this basic method);
- The same estimation of the average output energy from the turbine system has to be made This will inevitably be incorrect as no one can accurately estimate the variability of wind velocity Measurements taken over a long period, say 3 years, might provide some average data

If the above figures are developed a calculation of the number of homes that could be powered is possible resulting in a minimum, maximum and average numbers, BUT the results would still be highly inaccurate due to ill-defined actual wind velocity variation

Overall the Thunderbolt Wind plan is a fraud and an attempt by wind generation proponents and governments to make wind generation look reliable and attractive WHEN IT IS NEITHER

It's no use deferring to AEMO for enlightenment or facts as their ISP has clearly been debunked by the most credible of experts - with AEMO clearly acting against the best interests of Australia

Wind Farm Living EDUCATING THE LAWYERS SERIES

Lesson 30: Blade Rot

Turbines are good in theory but bad in practice - they are susceptible to **Blade Rot**. Airborne particles such as dust, salty air, hailstones, wind storms, fertiliser, and chemical sprays, cause considerable damage during high-impact collisions with the fast spinning turbine blades.

Over time, the tiny particles colliding with the high-speed blades cause major damage to the structure of the blades. The leading edge of a turbine blade is most vulnerable to deterioration leading to blade rot.

The internal layers of fiberglass separate allowing water to get in, weakening the blade, breaking down the structural integrity of the material, and eventually leading to blade rot.

Engineers in the video clip outline the problem of delamination of turbine blades (Blade Rot)

YouTube.COM
The Glaring Engineering Mistake That Made Wind Turbines Inefficient | Massive Engineering Mistakes

The Glaring Engineering Mistake That Made Wind Turbines Inefficient | Massive Engineering Mistakes - YouTube

Depth/diam (mm)	Pit	Gouge	Minor delam.	Major delam.
0,5				
	0,5	2,5	3,8	>3,8

Blade Rot

Blade rot reduces the lifespan of turbines. It seems wind companies don't want farmers to spray their land because the chemical and fertiliser residue causes blade degradation.

The confidentiality clause in a wind farm lease agreement prevents Host Farmers from disclosing that they are prevented from undergoing normal farming practices such as aerial or ground spraying of crops and pastures.

Prime agricultural land in Oz is therefore lost to turbine blade preservation.

The issues for the neighbours next door:

- Has the noise nuisance increased over time?
- Has the whoosh-whoosh-whoosh sound become worse? – do the blades squeal or roar louder?
- Do you believe the blades pose a risk to public safety?

Then there's the manufacturing issues.....

Neoen's Thunderbolt Wind has glaringly obvious, deliberate omissions of whole of life embedded energy & guaranteed cleanup.

Who will remove this massive hunk of contaminating concrete junk - what's the cost & emissions involved in creating & completely removing this?

Premier **Chris Minns admitted in Estimates** that the Wind & Solar Hosts like Thunderbolts will be responsible for their removal.

At approx \$600,000 - \$700,000 per Turbine - where's the Guarantee in this Assessment to ensure complete Removal & Remediation happens?

**A typically useless IPCN Condition requiring a Decommissioning Plan 'soon after Construction' is obviously disingenuous & meaningless.
Long suffering Crookwell is still waiting for answers!**

UNPLANNED FOR TOXIC WIND GRAVEYARDS

'The claimed 25-year life span of wind turbines has in reality been just 7-10

years(https://investorshub.advfn.com/boards/read_msg.aspx?message_id=173890865) before having to be replaced along with their enormous blades. That has significantly increased the operating costs of the wind farms and created a huge waste disposal issue (<https://www.instituteforenergyresearch.org/renewable/wind/wind-turbine-blades-will-continue-to-pile-up-at-u-s-landfills/>) that neither the industry nor state regulators were prepared to deal with. As a result, massive wind graveyards have popped up such as two gigantic ones on the outskirts of Sweetwater, Texas (<https://www.instituteforenergyresearch.org/the-grid/texas-grid-operator-asked-consumers-to-conserve-energy-again-2/>)

. The issue has been exacerbated by the government providing the tax subsidy again (<https://www.instituteforenergyresearch.org/the-grid/texas-grid-operator-asked-consumers-to-conserve-energy-again-2/>) to wind turbines that have repowered, replacing their blades.

The claimed 25-year life span of wind turbines has in reality been just 7-10 years before having to be replaced along with their enormous blades. That has significantly increased the operating costs of the wind farms and created a huge waste disposal issue that neither the industry nor state regulators were prepared to deal with. As a result, massive wind graveyards have popped up such as two gigantic ones on the outskirts of Sweetwater, Texas.

The issue has been exacerbated by the government providing the tax subsidy again to wind turbines that have repowered, replacing their blades.'

It is a Dereliction of Duty of Care that NSW Government & IPCN continue to deliberately fail to do their Due Diligence in enforcing up front Decommissioning/Remediation Bonds!

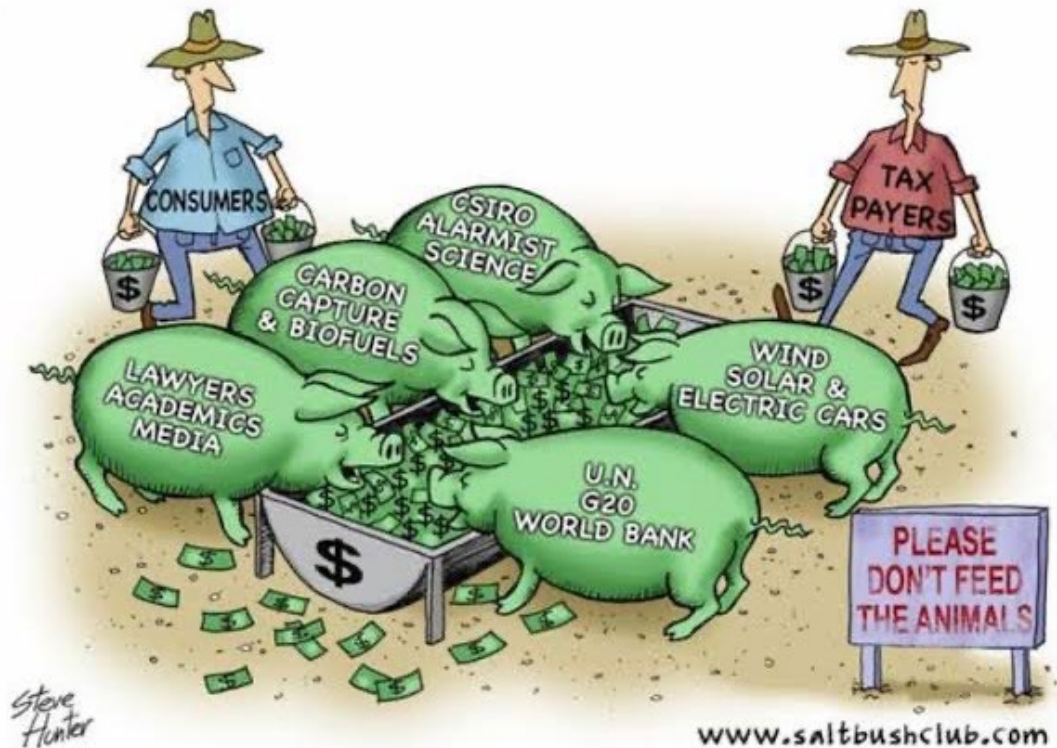

Our CHILDREN will be cursed with a massive electronic waste burden strewn EVERYWHERE with this RISKY MORAL HAZARD inflicted on the local community & Council by NSW DPE.

Our **CHILDREN** are increasingly suffering & being further tortured as the RenewaBULL Reality is a Transition to Extinction!

IT'S ALL ABOUT THE MONEY - NOTHING ABOUT THE GREATER GOOD!

“RENEWABLES ARE A VESTED INTEREST MASQUERADING AS A MORAL CERTAINTY”

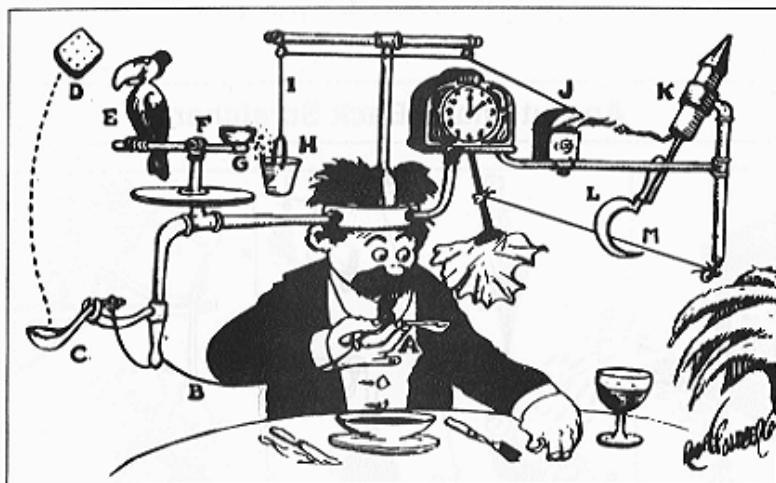

FEEDING THE FAT GREEN PIGS

HOW MUCH CRITICAL ENERGY INFRASTRUCTURE IS BEING FUNDED BY DARK MONEY?

RENEWABLES ARE SOCIALISM MASQUERADING AS ENVIRONMENTALISM.”

Self-Operating Napkin

The Imaginary, RenewaBULL Superpower Fantasy is just like the design of IRube Goldberg’s *Professor Butts and the Self-Operating Napkin* (1931)

The design of such a "machine" is often presented on paper and would be impossible to implement in actuality.

A **Rube Goldberg machine**, named after American cartoonist [Rube Goldberg](#), is a [chain reaction](#)-type machine or contraption intentionally designed to perform a simple task in an indirect and (impractically) overly complicated way. Usually, these machines consist of a series of simple unrelated devices; the action of each triggers the initiation of the next, eventually resulting in achieving a stated goal.

Here we see a similar crackpot experiment as outlined below by the previous CEO of AEMO where she alarmingly speaks about the **“known unknowns of running a power system that’s fuelled by renewables, and then there are the unknown unknowns.”**

Daniel Westermann is obviously, dangerously following in her footsteps!

Tapestry: X's Moonshot for the Electric Grid - The X Blog - 29th Oct 2021

<https://x.company/blog/posts/tapestry-grid-moonshot/>

‘Weaving together the technologies, information and partners needed for clean, reliable and affordable electricity’

Australian Audrey Zibelman is Fighting Climate Change at Google’s Moonshot Factory - 14th July 2022

<https://www.afr.com/companies/energy/the-australian-fighting-climate-change-from-google-s-moonshot-factory-20220713-p5b178>

“ its focus is on radical technology, that with the hope of being able to do things that have a material 10x impact on people across the world.”

“It’s an idea that I saw a need for when I was in Australia: the fact that the matter is, that **our process of decarbonisation is obviously causing us to really rethink how we both design and manage the power system, but it also creates massive data issues.** And the quite big opportunity that exists is to think about how we can use digitalisation, including what we would call computer vision, being able to have see things better... as well as artificial intelligence, machine learning, and cloud-based technology so that we can speed up the time for decision-making and instil confidence. **Because what we know, and what we’ve certainly learned in Australia, there are the known unknowns of running a power system that’s fuelled by renewables, and then there are the unknown unknowns.**

“And the best way to do that is through rapid experimentation, evaluation, looking at what works, pivoting quickly, working with partners, maintaining ambition, with humility, and learning that through learnings - which some people would call failures, but you actually need to call them learnings because that’s what they are - you can move quickly. It’s understanding how, when we think about technology, particularly radical change in technology, you start with a great deal of humility, a great deal of ambition and patience.”

It is blatantly obvious that Thunderbolt Wind will NEVER achieve its claimed aims & objectives & the RenewaBULL Swindle is NEVER going to work!
Instead it is RECKLESSLY RUINING AUSTRALIA & AUSTRALIAN PEOPLE WILL DIE BECAUSE OF THIS WILLFULLY NEGLIGENT RENEWABULL FRAUD!
