As a concerned citizen and farmer in the New England area of Tamworth NSW I reject the proposal of the Thunderbolt Windfarm. The irreparable damage to flora and fauna, compromised species, and detriment to farmers who life depends on the land and the health consequences to the people involved has been nothing but devastating. I am standing against the farm with the community of Kentucky against the ruination of this farming community. The fact that wind farming is already on it way to being antiquated shows the irresponsibility of a government trying to make a last ditch effort to meet unrealistic goals just to win an election. This is ruining our food bowl and the lives of countless good people. We need our farming land. The wind farm is not even a quick fix . REJECT The Thunderbolt wind Farm
