Subject: Submission Camden Gas Project phase 3

I write to object against any extension of the Camden Gas Project. My objections are on numerous grounds and are consistent with the objections of the Scenic Hills Association & others.

These activities are industrial extractive industries totally unsuitable for residential & scenic protected zoned areas. The unproven science & the proven dangers of CSG extraction would determine this activity unsuitable to any sensible person.

Finally the Community do not want this destructive & obscene industry operating, poisoning & destroying the environment in our region. I call on you to reject this avaricious & destructive proposal.

Faithfully

Len, Christine & Tom Williamson
