Subject: Mining project at Hunter alley
Date: Thursday, 3 September 2015 7:01:00 AM

It is vital for Australian thoroughbred racing and export of valuable racehorses that no mining activities are allowed to take place in Hunter Valley where most of the breeding and preparation of world famous Australian thoroughbreds are made.

A mining project in the area would most probably cause the breeding industry to relocate to another area most probably away from Australia with the loss of a profitable and glorious export activity aside from the wrecking of the beautiful valley!
