

Madam Chairperson and Members of the Committee

Thank you for the opportunity to speak

I have a couple points to bring up, using the analysis of an epic centre of an earthquake,

1. I would like to know how the animal life get from point A to point B for example koalas without being taken by their prey.
2. Using the analysis of the epic centre again, re valuation of properties the closer to the Epic-c enter you are the more likely the value in your property will be affected. Resulting in a financial loss
3. Question: - what guarantee does the community have that all vehicles connected with the wind turbine project will us Aarons Pass?
4. What safety measures will be placed on vehicle movement from Aarons Pass to Sydney road or from Sydney road to Aarons Pass?
5. While the minority getting the wind turbines will benefit the majority will suffer.
6. My last point How many of the property owners that are getting the wind turbines actually live on their properties.?

Regards

David White
