As local land owners and rate payers we strongly object to the proposed construction of the 100 mega watt solar farm in wallaroo NSW. It is wrong on every level.

1 Value of land will be severely impacted .

2 It will be a blight on the tranquil and pristine rural country side which many residents have paid many millions of dollars to live in this area. We must protect this land for our children, grandchildren and great grand children to enjoy.

3 It would be devastating to the local wineries in the area. This will affect tourism and visitors numbers. Tourists and locals love the " drive in the country" to support local. This will also have a huge affect on the blocks of land in Ginninderry -although Canberra residents were not involved in the consultation processes. Why not?

4 Heavy traffic movement would have a detrimental affect on the local access roads for a period of b12 to 18 months. The constant noise , pollution and dust would affect residences both mentally and physically.

5 If this proposal went ahead " with a stroke of a pen " the NSW government would affect the lives and livelihood of hundreds of people in this area and surrounding suburbs of the ACT.

We must stand together to protect this farm land for cattle and crops, not 182000 solar panels, 36 container size batteries and a sub station.

THIS MUST NOT HAPPEN!!!!
