Topic 1. Sustainability of current and future forestry operations in NSW

I am appalled that Australia is still logging our native forests taking away trees that many of our native animals etc need to survive. This should stop immediately before we lose many more. it is disgusting. Please STOP.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

As I have written above

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Why can't trees be planted in certain areas to cater for the above.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

As written above

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

We definitely need trees for survival of humans. I learnt this when I did my Horticulture Certificate
