Topic 1. Sustainability of current and future forestry operations in NSW

I sincerely ask that you stop logging in the Bulga native forest. As a former resident of upper Lansdowne and now [REDACTED] NSW I am becoming increasingly distressed by the logging of our native forests and the destruction of habitat trees for native animals as well as erosion and destruction of ecosystems where logging has occurred leading to damage of our water catchment areas. Particularly in these critical times where carbon sequestration should be our main priority as a country, the complete cessation of logging of our native forests is vital as our first step in reducing carbon emissions.

Yours faithfully, Joan Wedgwood
