Topic 1. Sustainability of current and future forestry operations in NSW

It is a disgrace to be logging our native forest with the climate catastrophe's we are facing and have already faced in this state. The fact that we are leading the world in flora and fauna extinction. For our government to be holding a nature positive conference at the same time the deadline for submissions into out dated forestry legislation is a disgrace. To spend millions on regeneration projects which will take decades to replace the destruction that is allowed daily by logging our forest and the destruction of habitat for critically endangered species that will be gone long before the saplings planted today will house and feed them. You cannot re create our biodiversity and the ecology that native logging creates. Stop native logging now.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Enough destruction of Cultural lands. All land is sacred. Enough destruction of our forest. Save our forests and all vulnerable species that rely on them.
