**Topic 1. Sustainability of current and future forestry operations in NSW**

I wish to support the reduction and finally see forest logging discontinued in NSW.

---

**Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

WE ALL need healthy forests for cleaning our waterways, providing habitat and holding carbon. I am looking to the future for my grandchildren and want them to have the benefits of clean air and water

---

**Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

We need to develop sustainable products such as using hemp, mass solar power and greater communication about the benefits of windfarms.

---

**Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs**

Plantations within the correct and supervised zones are needed but must be monitored

---

**Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models**

Aboriginal Australians can teach us their ways of sustainable management and work with companies to achieve mutual goals
