Topic 1. Sustainability of current and future forestry operations in NSW

SINCE THE EARLY SETTLERS IN NSW WE HAVE PROGRESSIVELY DECIMATED OUR NATIVE FORESTS TO THE POINT OF ALMOST NON EXISTENCE FOR VERY QUESTIONABLE COMMERCIAL INTERESTS WE NEED TO STOP NOW TO SAVE OUR ENVIRONMENT, REMAINING NATIVE SPECIES OF PLANTS AND ANIMALS AS WELL AS LEAVE OUR CHILDREN SOME NATIVE FORESTS, ANIMALS AND PLANTS TO ENJOY IN THE FUTURE.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

ALL THESE AS ABOVE.

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

THERE ARE MANY MORE SUSTAINABLE ALTERNATIVES FOR THESE ABOVE LISTED.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

KEEP OUT OF STATE FORESTS. IMPROVE THE DEVELOPMENT OF GOVERNMENT AND PRIVATE PLANTATIONS TO SUPPLY TIMBER NEEDS.

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

USE ONLY DESIGNATED PLANTATIONS TO SUPPLY TIMBER.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

ALL THE ABOVE ISSUES ARE THE ISSUE, LEAVE THE STATE FORESTS ALONE AND DEVELOP GOVERNMENT AND PRIVATE PLANTATION TO SUPPLY THE NEEDS.
