Topic 1. Sustainability of current and future forestry operations in NSW

Logging native forest is not sustainable

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Their value is immeasurable.

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Use timber plantations in areas that have already been cleared. Simple.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

There is plenty of already cleared land available for plantations. Buy it off farmers. No more logging native forests!

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

State funded deforestation makes no sense, why this was ever allowed is beyond me.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Follow indigenous land management practices. Stop the clearing of forests and the loss of biodiversity now.
