### **Topic 1. Sustainability of current and future forestry operations in NSW**

Our native forests are much more valuable as habitats for endangered species such as the koala and the sugar glider, as carbon sinks, for their value to First Nations and for their beauty - not for the wood in them.

Therefore I call on you to stop logging these precious forests now. Once cut down, they are gone.

---

### **Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

Protect the koala and sugar glider amongst all the other species who live in the forest including the underground environment.

---

### **Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

There are special forests grown for timber and much of the logging is sold too cheaply for woodchips. There are also other alternatives now for construction
