Hi. Unknown [REDACTED] operator with no expertise should be enough to stop this. As well this is a pristine agricultural environment not a highly industrialised area which then should exclude this development. As well most of the plastic is generated in sydney. Treat it at source in Sydney and dont add to greenhouse gas pollution with road transport. As well traffic conditions here cannot cope with current conditions. As well having worked as a project director on major works in [REDACTED]

As well, I doubt this project with this operator will meet the environmental compliance requirements initially or long term.

environmental compliance

This approval is suspect
