*I object to the plastic recycling facility in Moss Vale as I am concerned about the potential health effects on my young family, myself and also my older relatives living in the area.*

*The Southern Highlands are known for the clean, pristine area and I feel that introducing a recycling factory with harmful and toxic chemicals and pollutants will affect the health of the people, the environment and the animals in the area. Not only that but the increased use of the already busy and damaged roads in the area will also have adverse affects for drivers and possibly even pedestrians. Our area is not equipped to handle the traffic it already experiences let alone another 100+ trucks a day. I see no benefit in this recycling facility being built in our area whatsoever.*

*It causes me distress to consider the potential pollutants that will affect our health just from being outside and what the run off could do to our drinking water.*

*I really hope that the state government considers the people who will have to deal with the health fallout from the recycling facility and not just the money in their own pocket. We are real people who are rightfully concerned and fighting against something that feels like it could be out of our control.*
