*I highly Object*

*The health of humans & animal species I fear are at risk*

*Do who ever approve of this at all CARE or do they only feel power !*

*The millions of \$\$\$\$\$ going to go into this project should be on More Hospitals , Doctors , Paramedics, Frontline Workers Etc*

*In which we are well in need of !*

*What happens when a rise in illnesses come . Will it be swept under the mat or blame other sources*

*I can feel eventually a huge law suit when this happens and rightly so !*

*Greed is the factor and Power over us little guys*

*As it is hospital corridors are filled up with waiting patients dropped by ambulances because understaffed and over worked staff !*

*And will be more so when people start dropping from toxic waste from this thoughtless project*

*It's ok to shrug your shoulders but wonder what happens if it happens to your own family member . Or that does not matter*

*We should have a say we have a right to have a say and the traffic going to this facility Unbelievable*

*I say NO like a lot of the town folk*

*Think of our health*

*Spend money on a more worthy cause*

*But then again it's not YOUR money your wasting that is only going to in time jeopardize people health*

*Unfair and entitled think how that money could be well utilised for those that deserve it*
