*I share the views of any sound individual that the moss vale plastic recycling facility should not be approved. This operation will have disastrous consequences for not only the local communities but has the potential to cause wide spread negative impacts. Australia is a vast and open country why is it a wise decision to place a plastic recycling plant within hundreds of meters from residential houses. There is not enough answers to the questions of long term effects for local people, the water supply to the factory, the ways in which the plant will managed long term ect. This would be a monumental fuck up to allow this submission to be approved, the people of the Southern Highlands and NSW are pleading with the planning commission not to go through with these plans. Please listen.*
