I object to the proposed plastic recycling refinery in Moss Vale on the following grounds:

- 1. Too close to residential areas (within approx 200 metres) “ high risk of human, residential and animal/wildlife loss in event of fire.*
 - 2. Too close to the Garvan Institute (the ABR “ Australian BioResources facility), only 50m away “ high risk to human and animal loss in event of fire, noise and vibration may disrupt the breeding cycle of the research mice. (The ABR is a world class state-of-the art facility for breeding and holding mice critical for medical research into the fields of cancer, mental illness, arthritis, asthma, heart disease, diabetes, obesity and genetic conditions.)*
 - 3. Too close to schools, with several schools and childcare centres within an approx 2 km radius. Potential risk/harm to human health in event of fire/explosion, failure of water/air filtration processes.*
 - 4. Increased heavy vehicle traffic creating noise pollution, air pollution, dust, vibration, potential accidents, potential fatalities of wildlife, potential importation of weeds from other areas, increased degradation of roads.*
-
