I am opposed to the location chosen for the Moss Vale Plastics Recycling Facility (Plasrefine). I am not opposed to plastic recycling, but the site chosen is close to homes, schools and the Garvan Institute, and the roads aren't built for the increase in traffic.

There are major concerns including the design is such that westerly winds will drive plastic particles into residential areas, including Bowral and other parts of the Southern Highlands.

The current proposed location is close to a creek which flows into the Wingecarribee River which flows into the Warragamba Dam which supplies parts of Sydney with water.
