This will be an absolute catastrophe if this gets final approval. The impact it will have on the health of the local community is diabolical. The pollution in the air and waterways is monumental. Why is this proposed site so close to townships, including a number of local schools & preschools. It has been well documented the types of illness that comes from the result of microplastics being released into the air and waterways, including cancers, dementia and other life threatening illnesses. This is NOT the correct location for Australia's largest microplastic plant.
