I moved to [REDACTED] 12 years ago. The owner of this property has lived here for 30 years. We grow flowers, dahlias and roses. We pride ourselves on being clean and green. We have dams and cattle. I have health issues that demand clean air. Not only will the factory generate pollutants which Plasterfine says is solved by staying inside, but there will be a ridiculous increase in truck movements which will dramatically boost airborne fuel pollution. This development will destroy our community, our clean air and above all our safety. Water will become dangerously polluted. I fear that the State government will push for this to go ahead because it is not in Sydney's backyard and that the irresponsible and inexperienced Plasterfine has bamboozled authorities by saying that they are helping the environment through recycling while they will in fact create ghastly air pollution destroying our beautiful region. Please, please, please don't ignore our plight. Don't destroy our lives. Don't reduce the value of our properties with this ill placed, thoughtless development by an inexperienced company. Please don't be swayed by the rhetoric of this manipulative company. There is no sense in pretending that this community's lives will not be affected in a profoundly negative way.
