

## Martins Creek Quarry Project SSDD6612

Re : Martins Creek Quarry Project SSDD 6612

Dear Sirs,

I'm writing to you as a resident of Bolwarra Heights and this letter will be at least the 3<sup>rd</sup> objections letter I have written with regards to the Martins Creek Quarry Project SSDD 6612.

The proposal was rejected twice and we are still objecting to the proposal. Martins Creek has been a safe corridor for many wild life in the area and the expansion they are proposing will have a significant impact on the safety and welfare of the wild life we are proud to be part of.

As a resident of Bolwarra Heights in the last 24 years I have noticed a significant increase in the traffic along Total Road through the third runaway. I walk my dogs every morning and the amount of trucks and school busses and motorists already congested the area in the last 10 years.

An increase of the propose 280 trucks will only make the traffic even worse. In the last 10 years it has taken me longer to go to work which is only about 17 km from where I live and at present it took more than between 15 to 30 minutes to drive this 17 Km so you can imagine if the proposed application is approved with this extra 140 trucks during morning peak hours I don't how long more do I have to drive to work and I was not the only motorist using the 3<sup>rd</sup> run way.

Safety of school children and pedestrians are also at risk as Davacon's contractors have no concerns of safety by driving their trucks well over the 60km limits flying through a narrow pedestrian paths, it is just a matter of time for accidents to happen.

The impact of this proposal will be so significant to the well being of the greater community in this area in the long term. I asked therefore for the Minister to consider all these issues and the long term impact of your final decision.

Thank you for hearing the voice of the community, I remain.

Regards

Lintie Setiawaty Tjahjadi
