

OBJECTION

I object to the Hills of Gold Windfarm SSD-9679.

I was co-owner of property NAD 73., until 16/12/2023, [REDACTED] 2338.

The misinformation provided to me by representatives of the applicant caused me personal stress and anxiety to the extent that this property was sold.

My advice was that the property sold below the fair market value that which would have been achieved if the Windfarm was not going through an approval stage of being developed.

The emotional turmoil caused to me was too much and I have absolutely no respect for those who are incapable of recognising wind turbines should not be placed in this area.

Please leave some of Australia as Australia!

We aim to protect endangered species and rural Australia's natural landscape should be included as such.
