To PAC

Below is an email I have sent to the Mayor of Port Stephens this is my submission to you I would also invite you with you family's to come to Williamtown along with the Prime Minister and the Mayor if you can honestly say this is safe

This is the new Asbestos

People were told Roundup was safe it is now classed as a Cancer causing agent  
How can anyone morally allow this contaminated sand to be distributed through out NSW

This is a Public Health Issue

**Subject:** Cabbage Tree Road Sand Mine

Sir

I wish to make a request to you and your Council to halt the development of the proposed sand mine on Cabbage Tree Road Williamtown

I attended the meeting at Tomago Bowling Club which you also attended

I am one of the 50 plus Cancer sufferers along Cabbage Tree Road

I find it morally wrong that this sand mine can even be thought about when it is in the RED ZONE

A couple of months ago I stopped a council employee from spraying the drain on the adjoining property with Roundup as I am a beekeeper and Roundup kills bees. He told me that your council can't use machinery to clean the drains because of the contamination in the RED ZONE so how can you then allow sand to be removed from the proposed mine site.

We cannot remove sand or soil from our properties can't eat our produce but by some magic the sand mine is ok

As for all the expert evidence I would like to point out that a young lady stood up at one of the Defence meetings and asked the head medical officer if she could breast feed her baby when it was born the answer was YES even though she was in the RED ZONE

The baby was born and when the little boy was tested his levels of the chemicals were thru the roof so much for the expert panel

The RED ZONE boundary has been moved several times because they just can't get it right

The sand mine has been a problem from day one you heard of the murky deals on the evening of the meeting funny how the other two councillors didn't turn up that represent our area maybe their interests lay elsewhere

This now goes beyond the increasing traffic problems and the noise problems this is about human health I'm sure you watched A Current Affair this week

Our problem is now being heard Nationwide via social media TV and press  
you have a moral responsibility as our newly elected Mayor to right the  
wrong that was done by the previous Morally bankrupt council  
I have invited the Prime Minister to bring his family to Williamtown to play in  
the drains and the sand I also invite you and your family if you are convinced  
it is safe

David Vial
