As a long time resident of Wallacia I am lodging a formal complaint regarding the proposal to destroy the village area of Wallacia by placing a crematorium and cemetery in the middle of our town. This will rob all residents of the rural atmosphere they chose to embrace by living here. This proposal will greatly increase traffic and noise on Park Rd which is now overburdened with the traffic from Warragamba and housing developments in Silverdale and already in poor repair.

It will rob local residents and members of their golf course...and also a place where elderly residents from the nearby retirement village are able to meet socially. Having a cemetery and crematorium on this site would contribute to pollution of the nearby waterways which feed into the Nepean river...particularly in times of flooding. Air pollution from this proposal would compromise market gardens in the area as well as the tank water some residents rely on.

This proposal will also have a negative effect on real estate prices and have no economic gain to the local economy. It would be most distressing for residents having to pass this proposed development each time we venture from our homes...where we enjoy a relaxed rural village lifestyle. Please do not allow this proposal to go ahead on land that was originally gifted to this community...it would destroy the historic landscape of the Mulgoa Valley and our lifestyle.
