Subject: proposal for cemetery at the site of Wallacia golf club
Date: Tuesday, 19 March 2019 5:51:17 PM

I have lived in Wallacia for 45 years and on many occasions have experienced the Wallacia village...including the golf course.... completely surrounded and isolated by flood waters. If this proposal were to go ahead in times of floods toxins from the proposed cemetery would seep into flooded areas around the village and then Jerry's creek and the Nepean river. Locals have used the river for many years for recreational pursuits. If this proposal were to go ahead the river would be too badly polluted with toxins from the proposed cemetery for any recreational activities.

I have seen flood waters in the play ground of the Wallacia public school. I'm sure nobody would want to see their children play on ground that would be polluted with toxins from the proposed cemetery at the Wallacia golf club. I vehemently oppose the proposal to build a cemetery on Wallacia golf club site...in the middle of our picturesque village and in a flood zone. Thank you. Jane Tickner [REDACTED] Wallacia. phone [REDACTED]
