

Good Morning All

I wish to voice my disappointment with the decision of the Department of Planning to recommend that the Independent Planning Commission rule in favour of the Development Application for a cemetery in Wallacia as they feel "IT IS IN THE PUBLIC INTEREST". We as long time residents of Wallacia feel the Government has let us down and are not listening to the local community concerns regarding a cemetery in the middle of our beautiful rural village.

The proposed cemetery is placed in the Wallacia floodplains as stated in the NSW Government SES plan (see page 8 for map highlighting the Wallacia Flood Plains) [p. 1677 of s. 1677 of the Local Government Act 1995](#).

It clearly shows the village of Wallacia in the probable maximum flood.

I cannot see how the IPC can recommend the Wallacia Golf Course would make an ideal location for a Cemetery when there has been 3 DA approved Cemetery and Crematoriums one located in Luddenham & two on Greendale Road.

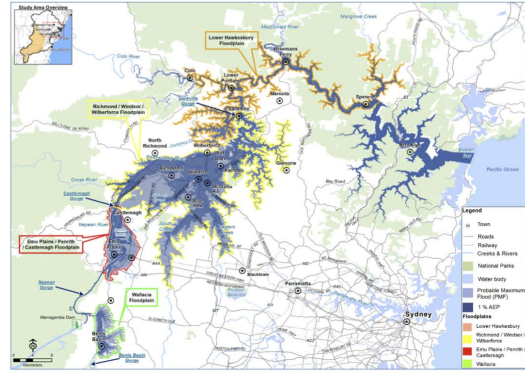

With the Western Sydney Airport the Aero Road and the Technology Park on our doorsteps and only a few years away the government must make every effort to preserve all open space and parklands for community use.

I truly believe the Golf course should be preserved as open space and parklands for the entire community to enjoy.

I hope you can take my concerns on board and do whatever is within your powers to prevent this DA from being approved.

Yours Faithfully

Tessie (Tessie Nassif)
