

Independent Planning Commission

23 March 2019

Dear Commission,

I do not want a cemetery and crematorium on the existing Wallacia golf course.

I am:

- Concerned of dangerous crematorium airborne emissions coming into my home.
- Concerned that burying bodies in a flood zone will have wider effects on my property and the water table.
- Concerned about the destruction of trees to make way for the cemetery.
- Concerned that there is talk of council planning documents having been updated with errors that now allow a DA submission for a cemetery on the golf course.
- Concerned for the value of property nearby the golf course. Owners paid a premium to buy near a golf course only to see it turned into a cemetery.
- Concerned about the increased danger of travelling on park road.
- Concerned that land donated to the crown, as a golf course, could become such a scar on the heartland of the giving community and its generosity.
- Concerned of the noise generated by some cultures during funeral ceremonies.
- Concerned of the visual impact of the cemetery from my home and access roads.
- Concerned for my local community from the detrimental effects of this intrusion on the heart of our community.

Please help us show this is not the location for a cemetery & crematorium.

Thankyou

Terry Read
