Dear Commission

I object to a cemetery being built on the Wallacia Golf course near our home. I have 3 young children and bought a home in 2014 to raise them right at the back of the Wallacia golf course.

We have to travel to sports as there is nothing in Wallacia for them at this age but I hoped they would take up golf as they got older. I am worried about the emissions from a crematorium so close by, as some of my children have exma and asthma. The wind blows across the golf course to our house most of the time.

If you have to use land from the golf course then it should be improved with a swimming pool and sporting fields, as this is about community and community health. Don't take away our only sports land, so money can be made.

Taking my children to school, I have to be very careful entering and exiting Park Rd due to the many tipper trucks going at speed to or from the Warragamba quarry. Very scary now.....what about the increased traffic and risk with unsuspecting funeral attendees and funeral processions....likely be an even more dangerous road.

Really hope you can see and portray that this cemetery proposal is not suitable in the heart of Wallacia.
Thank you.

Tracey Haddad
