Attention: Independent Planning Commission

Dear Sir / Madam,

On behalf of our company SRO Group Pty Ltd, I wish to express our support & approval of the Kepco Bylong Coal Project. I have been following this project for quite a few months now since hearing about it from our local industry collaboration group HunterNet, of which we are a member.

I understand there are the inevitable environmental & community hoops to jump through but I hope these can be resolved to the satisfaction of all. Kepco have been sending me out regular community newsletters (emails) to keep me (& others) up to date on the project, so I like their forthright & open approach. I trust this is occurring with their submissions to you.

SRO are a Newcastle based Electrical & Fabrication / Mechanical Engineering & manufacturing company. From our point of view, we need these types of projects to provide employment for the manufacturing industry, if not for us, at least for Mudgee / Muswellbrook & even Sydney based companies. I understand up to 650 jobs will become of this project during construction (& many more indirectly, such as to manufacturing companies like us) & I'd imagine many ongoing jobs too once in operation.

Another positive that I see is the relationship with the technological powerhouse of South Korea. Australia should invite more South Korean investment in our country.

I kindly ask that you review this project in a positive light for the local & nearby communities & businesses & give it the tick of approval. If you have any questions, please ask. Thank you for your consideration.

Regards,

Malcolm Rumbel | Business Development Manager
