IPCN Chair Professor
Mary Kane AC
Level 3, 201 Elizabeth St
Sydney NSW 2000

Dear Professor

Previous correspondence

with Commission, Yam Valley Wind Farm proposed site.
My only objection to project is visual pollution. Too many
Wind Turbines. Use of turbines on a smaller scale.
Design thermo electrical Reactors, which can be
constructed at ground level. Changing energy composition
around eg Wind power to produce electrolysis into
Hydrogen gas. Store charge in a Gold coil figure pattern
eight. Virtual frictionless instantaneous power.

Yours faithfully
