Subject: RMS information on South St Leonards

Dear commissioners,

I have just received information from from the RMS saying the RMS has not been informed of significant nearby developments that could affect traffic in the area.

In a subsequent phone call Rachel Davis, Senior Strategic Land Use Coordinator, at RMS [REDACTED] [REDACTED] said any traffic study which preceded the Dept of Planning report on Crows Nest St Leonards is obsolete.

I notice that such Lane Cove Council traffic studies have been presented to the IPC in support of their development.

I am writing to ask if the IPC has received an updated assessment on the traffic situation when/should all the proposed developments be built and occupied.

Cheers
David Kelly
