Subject: Submission re United Wambo
Date: Monday, 5 August 2019 10:42:25 AM

I am totally opposed to the United Wambo coal mine project. I am fully in support of Prof Steffen's expert advice about United Wambo for Hunter Environment Lobby that the carbon budget for achieving the safer course of limiting warming to 1.5 degrees is only 155Gt, or fifteen years of emissions at current rates. **Prof Steffen's reasonable conclusion from all of this is that there is no room in the atmosphere for any new coal mines.**

Nonetheless I congratulate the NSW Independent Planning Commission's proposed condition that would require an export management plan "to the satisfaction" of NSW Planning Secretary Jim Betts and for United Wambo to "use its best endeavours" to ensure coal from the site was exported to countries that had signed the Paris Agreement or had policies consistent with its goals.

In addition I congratulate the IPC for instead of simply workshopping conditions with the proponent of the mine, as of old, the IPC is giving the public an opportunity to have input into this matter.

Yours sincerely,

Simon
