To whom it may concern , I am writing to you in regards to the Vickery IPC hearing which is scheduled on Tuesday 18th December.

With the current drought ,lack of harvest and the now the withdraw of one of your commissioners ,we ask for the postponement of this hearing. We feel this is being rushed and do not understand why this process is happening at all.

There is a lot of stress on our local community and farmer's brought on by this project and we feel this is unfair so close to Christmas. With an inadequate EIS to which the EPA has stated they were unable to assess because of lack of information.

I hope that you can understand our communities opinion and consider our request for postponement.

Please do not hesitate to contact me [REDACTED]

Regards
Carolyn Nancarrow
