Subject: Fwd: Kings Forest Management plan KPOM : major concerns
Date: Monday, 11 March 2019 10:32:26 AM

Dear Planning Commission members ,

I, John Harold Peters, would like to personally express my concerns about the three major shortfalls of the

KPOM Management Plan, which has been modified 4 times since 2010!

1. The offset planting of 27Ha of Koala Food Trees is not clear and remains unresolved.

It must be secured through binding or legal arrangement before any construction commences.

2. The E\entrance roads through Environmental Protection Zones must have underpasses before any construction commences.

If ONLY fencing is installed without underpasses it will result in Koalas and wildlife being cut off from their natural corridor for many years.

3. The Cudgen Paddock (golf course) should not be fenced off. The intent was to remain as a wildlife corridor.

Fencing will stop the Koalas accessing their food trees. The fencing should be placed around urban areas that

above the golf course, thus allowing koalas and other wildlife unimpeded access to their food source.

I trust that you will consider the concerns I share with the members of the Team Koala and many of my fellow residents along the Tweed coast and within the Tweed Shire , and that you will make your decision accordingly **to protect our highly endangered Koala population..** These animals need our protection as the human species ever expanding has a moral and duty

of care to the environment and our fellow creatures now AND INTO THE FUTURE.

Thank you very much for your kind cooperation .

With kind regards

John Harold Peters
