Subject: Objection to Dartbrook mine reopening
Date: Thursday, 11 April 2019 2:10:02 PM

Dear Sir

I could not believe the greed and folly of the group charged with assessment of the viability of the Dartbrook Mine.

No consideration of the impact on traffic in the New England Highway, on the people in Newcastle putting up with the truck and dust covering houses and gardens and the danger to health of people as they bring such foulness through the country to our city.

I object also to the damage that coal does to our planet and the constant pressure put on Government to agree to mines which enrich overseas companies and impact on the health of Australian people and destroy the planet we live on.

Do the decision makers believe the guff presented to be skewed to MONEY? Not to Aussie people but to overseas conglomerates who don't care about the environment because they only believe in the MONEY they can make to make them richer and more POWERFUL than the makers of guns and weapons of mass destruction.

Please reconsider your decision. Listen to the voices of the people who care about the planet and the people effected by digging and cartage of coal. Where do the MONIEED PEOPLE LIVE? Not on the New England Highway or Northern bypass! Not even in Australia.

Yours Sincerely

Elizabeth Brown
