**Subject:** Objection to the Dartbrook Coal Mine Modification 7 (DA231-7-200 Mod 7)  
**Date:** Tuesday, 16 April 2019 10:12:29 AM

---

I am Janet Thompson and I live at [REDACTED], NSW 2041.

I have visited a friend with property in the Hunter, and have driven around the area.

I object to the Dartbrook coal mine modification as above, as many experts believe the application ignores many important issues or gets facts wrong. My major concern is the effect of the mine on water, which is of course, our most important resource, enabling not only our food and livestock to grow, but for us to survive.

Also, it seems extremely short sighted for Australians to be digging up more and more coal, or proposing to, as the world needs to cut its carbon emissions as soon as possible, not contribute to them skyrocketing, as I am sure the owners of the Dartbrook mine are aware.

I believe that the application should fail.

Thankyou,  
Janet Thompson
