1. World use of coal is declining.
2. Existing mines can meet world demand.
3. Medical experts state that there are particles in our local air which our body filters cannot remove.
What will ^{be} the impact of this on people who are breathing it for 40 or 50 years.
It is not known at this stage if this will lead to another "asbestos-type" disaster.
4. Muswellbrook/Singleton area has some of the most polluted air in New South Wales
Why add to it!
