

Objections to ongoing development in Leo Drive Narrawallee.

- 1) Leo Drive Access . This road was a quiet development of Narrawallee – relatively well-planned, with parks, walkways and bushland, and above all healthy trees of older growth giving the area a pleasant and bushy feeling.
- 2) Now however, it has become a dangerous fastmoving traffic throughway with often a very threatening (at times) and noisy , and often quite continuous motorway. Children and locals walking their dogs, people accessing bus stops, and families playing in the park have to be constantly on the alert for fast and thoughtless drivers. Also, difficulty even getting out of driveways.

SUGGESTIONS :

- a)* traffic slowdown devices such as humps and devices to slow down the throughtraffic
- b)* perhaps a roundabout at Leo Drive/Sagitarious Drive area and other road entrances where local people have voiced concerns.

NO MORE CLEARING of trees along the high ridge. The visual impact of anymore clearing will be devastating for the residents and the environment.

This is becoming extremely disturbing. The excess clearing has also virtually wiped out what used to be a pleasant bush walk – a release from never-ending suburbia, and also a habitat for the bit of remaining wildlife in the area.

There seems to be no provision for walking paths, open space with trees within this new development.

The developers have arrogantly used Leo Drive as a thruway to access their moneymaking development without regard for people who have been living in this established area and negatively impacting on our surroundings and endangering our children, seniors, pets etc. to an unacceptable degree. Its only a matter of time before a horrible accident occurs.
