Please accept this email as a protest against 6 additional blocks at Carinya Place the whole new estate area is a tragedy with old growth forest shredded affecting flora and fauna. The walk to Narrawallee inlet destroyed with biggest oldest tree I have ever seen standing only with 100 meters it's tragedy in this day and age. The area is home to the black cockatoo their native food the She Oak their main source of food. Please do not allow any further desecration in this area.
