Narrawallee Land Clearing

I am writing to object to the developer's application to increase the number of housing blocks by 6.

The developer has brutalised this whole area by clearing the entire site with more destruction to come. The development has shown absolute disregard for the sensitive area that it has destroyed.

People who bought into this area did so in good faith and expected that public spaces had been set aside for the enjoyment of all residents. This is unfair and should not be allowed as it detracts from their environment and their investment, but not Hazcorp's.

The other serious problem with the extra blocks, if they are approved, is that the public space that is to be retained behind them becomes land locked with no open access (apart from walkways between colourbond) from the public who wish to use it and develop it for the enjoyment of all.

This whole development has been contentious from the very start, residents in Narrawallee are saddened by the destruction that has occurred already. Habitat has been destroyed and fauna displaced forever.

The developer should not be allowed to upset people any more than has this project has already. I appeal to the Independent Planning Committee to disallow this modification.

Frank Ward
