John & Diane Paegle

██████████ Narrawallee

In reference to MOD3 MP06-0276 MOD3.

We oppose the amending of the DA in which Hazcorp propose development of the treed nature reserve at the end of Carinya St in Amaroo estate and oppose clearing of any flora for which permission has not been granted in the original DA.

The reasons for this are:

1. If a developer is granted permission to increase allotments in the subdivision during development then the intent of original DA will be altered and State planning might as well be handed over to developers to do as they please.
2. Too many trees have already been cut down and visually the subdivision looks like a moonscape. The finished product will be houses that are nearly touching each other and a lack of woodland for animals to take refuge. I am disgusted that Planning NSW has total disregard for Flora & Fauna. The subdivision is in no way similar to the town of Narrawallee that has beautiful treed streets and corridors for animals live and travel in. Additional tree felling will only add to this scared landscape.

Please do not allow Hazcorp to cut down more trees.

Yours Sincerely

John & Diane Paegle
