---

I am very concerned at the prospect of designated green space in this subdivisiin being given up for 6 more housing blocks. All housing subdivisions need green space in easy walking distance as a place for neighbours to meet and connect, children to play together, and an opportunity for people to get a bit of exercise. So many good things come from neighbours in a community having a place to get together.

I believe there is a concern about the maintenance of the proposed park and it seems appropriate to me that council should take responsibility for this in the same way the other public amenities such as roads and footpaths are maintained.

The extra rates generated by this huge subdivision should cover this and it also contributes to local employment.

Kind regards  
Jude and Gregg Orphin
