MUST WRITE BY TUESDAY RE NARRAWALLEE LAND CLEARING.

I would like to voice my objections regarding the development of this section of land.

Having observed the development and how it has been executed I am shocked by the blatant lack of concern for the environment.

This development could have been done so differently with consideration of the land, the people who will be living on it and the effect on the inlet.

By developing it with the community in consideration, so that it is a healthy and dynamic place to live side by side with nature, the whole area could have benefited. However instead - a decimation of the land creating soil degradation and habitat destruction has created an eye sore. I strongly oppose the further destruction of the small areas that have been left undeveloped e.g.

6 extra house blocks at the southern end of the subdivision in Carinya St.

Regards
Margaret Shaw
