I am strongly opposed to the amended DA in Narrawallee for 6 extra house blocks at the southern end of the subdivision in Carinya St. This will destroy a lovely stand of tall trees, which provide shade for the council reserve strip along Seaspray St. The trees provide much needed habitat for native birds and wildlife, given the significant clear felling of forest adjacent to Garrads Reserve already undertaken in the project zone so far.

There has been a pattern in recent years in this part of the south coast for

developers to amend DAs after their initial plan is approved, to expand the size of their projects.

Our environment suffers even more as a result.

Our Council and the State Planning authorities must act to ensure these amendments are not rubber stamped despite significant objections by our local communities.

Peter Earley
